

第752192号 作文

There is a sharpen contrast in two cartoon. In the left picture, although the father demand his child to work hard, he is watching TV and touch a cigratte. In the right photograph, the father and his child are studying hard. We are informed that it is better to set a good example rather than only demand his child to do something.

As far as I am concerned, I think, in the right picture, the father's way is better to educate his child. It is vitally significant to set a model in the prograss of educating child. Firstly, there things, that parents are doing, can influence their behavior. The saying going that parents are the best teacher for their child. Moreover, when you work hard rather than take some playing action, it is creating a favourable studying environment. Last but not least, when you are watching TV, you demand your child to work hard ,your child is unhappy and also want to watching TV together.

As a parent, it should put great emphasis on setting good examples. Only in this way can you child have a nice growth and benefit to you.
