第751903号 作文

As is vividly illustrated that a great deal of graduated students at universities will choose a way to work hard. These ways are seeking a job, taking an exam,going abroad and becoming hoster of firm. This is a common phenomenon on the campus. We should be how to choose better?

I think these elements should be considered. First of all, what is your dream? And you feel like to how to achieve your value? It is the important element that can help you take the first step choice. In addition to the element of yourself dream, you ought to weight your current conditions. It includes the ability to qualify the job, your financial state and so on. What's more,you should take parents' attitude seriously and consider these elements, you are also able to make a favorable choice.

In a word, as a graduated student. It has never ways but face them. It is vitally significant to make a choice by considered various elements.
